EDUCATION

JAYPEE INSTITUTE OF INFORMATION TECHNOLOGY

Noida, U.P, India

B.Tech, Electronics and Communication Engineering (ACT)

2024-2028

CGPA: **9.03/10.0**

Relevant Coursework: Telecommunication Engineering, PRP, Linear Algebra, Physics I & II, Artificial Intelligence, Mathematics I & II, Digital Signal Processing, Analog and Digital Communication, Signal and Systems, Financial Accounting.

KENDRIYA VIDYALAYA

Noida, U.P, India

86% in 12th & 89.5% in 10th

April 2024

Relevant Coursework: Python Programming, MySQL, RDBMS.

ABOUT

I am a third-year B.Tech student at IIIT Noida with a strong passion for electronics, coding, development, and building real-world solutions. As a full-time learner, I constantly explore new technologies and sharpen my programming skills, driven by curiosity and a desire to grow every single day. I believe in learning by doing and improving step by step. Open to internships, projects, and connecting with people who enjoy building things. Beyond coding, I am an avid cricket lover who finds joy both on and off the field. I am always eager to learn, grow, and make an impact in the tech community!

PROJECTS

ACCOUNTING APPLICATION (IN PROGRESS)

(In Progress)

- Developing an accounting app to simplify financial record management.
- Generates core accounting records such as Journal Entries, Ledgers, and Trial Balance.

ARDUINO-BASED EMBEDDED SYSTEMS PROJECTS

May 2025-Till Now

- Developed multiple Arduino-based systems including obstacle avoidance robot, temperature monitoring system, and LED control circuits.
- Worked with sensors such as ultrasonic, temperature (LM35), and IR modules for real-time data processing.

PLAN MY JOURNEY (TERMINAL-BASED APPLICATION)

April-May 2025

- Built a terminal-based travel planning system using C++ and MySQL.
- Allows users to manage routes, destinations, and travel details efficiently.
- Implemented database integration for storing and retrieving data.

FREELANCING WEBSITE (BITBOX 5.0 HACKATHON)

April 2025

- Collaborated with a team to develop a freelancing platform during a hackathon.
- Gained hands-on experience in rapid development and teamwork.

SKILLS, ACTIVITIES AND INTERESTS

Technical Skills: C/C++, Python, HTML/CSS, Javascript, MATLAB, Proteus, MS Office, AI/ML.

Languages: Hindi, English; Limited proficiency in German

Activities: Volunteered 5 months within the Campus Robotics Club (μCR), supporting team activities, assisting in project builds, and helping coordinate events and workshops.

Areas of Interest: Embedded Systems, Signal Processing, Software Development, Circuit Designing.
